

# Copper Anodized Finish

Striking visual effect, low maintenance, and design flexibility.

This exclusive copper anodize finish offers our customers the look of rich, real copper without such shortcomings as salt run-off stains, galvanic corrosion and patina.

- Bright copper color on aluminum components, with no patina over time
- Visually interesting depth and specularity in an all-natural finish
- Ideal for Southwestern- or historically-influenced design palettes
- Three-step electrolytically-deposited AAMA 611 A44 Architectural Class I durability and warranty
- Superior abrasion resistance
- Eco-friendly matte etching with no VOCs generated
- Available on extrusions with high recycled content
- No clear coat or periodic lacquer treatments required
- No run-off stains or galvanic corrosion from copper ions
- Can be applied to aluminum sheet or extrusions up to 24 feet - No limits on shapes or quantities
- Like all Linetec anodized finishes, superior process control helps ensure industry-leading color consistency
- Economical and quick - No custom color-matching required
