PRODUCT INNOVATION
AWARD WINNER

*"Sleek design, innovative science,
well thought out technologically,
very impressive."*

Patent Pending

Ride the waves to energy savings!

aLuminate® light shelves feature a wave-type reflector to diffuse natural sunlight and project it deeper into the room. This helps reduce the energy demand associated with artificial lighting, and supports LEED credits.

LEED Credits Supported:

- Daylighting and views
- Thermal comfort
- Optimized energy performance
- Recycled content

These light shelves are easily installed and can be configured in projection depths from 12 to 36 inches with horizontal free spans up to 60 inches.

See how easily you can save energy with style today.

All extruded products are manufactured
using EcoLuminum™.

More recycled content, eco-efficient finishes
