

Copper Anodized Finish

for striking visual effect, low maintenance, and design flexibility

- Bright copper color on aluminum components, with no patina over time
- Visually interesting depth and specularity in an all-natural finish
- Ideal for Southwestern- or historically-influenced design palettes
- Three-step electrolytically-deposited AAMA 611 A44 Architectural Class I durability and warranty
- Superior abrasion resistance
- Eco-friendly matte etching with no VOCs generated
- Available on extrusions with high recycled content
- No clear coat or periodic lacquer treatments required
- No run-off stains or galvanic corrosion from copper ions
- Can be applied to aluminum sheet or extrusions up to 24 feet - No limits on shapes or quantities
- Like all Linetec anodized finishes, superior process control helps ensure industry-leading color consistency
- Economical and quick - No custom color-matching required
