LEADERS IN ECO-EFFICIENT STOREFRONT,  
CURTAINWALL AND ENTRANCE SYSTEMS

# Leaders in Eco-Efficient Storefront, Curtainwall & Entrance Systems

**100% of Tubelite's Extruded Products are Now Made from Recycled Aluminum**

**NEW! Environmentally-Friendly, Anodized Finish**

ALL product extruded by Tubelite is manufactured from recycled aluminum. The composition of this eco-efficient billet has been specially formulated to an industry-leading average of 80% reclaimed aluminum incorporating a post-consumer content average of 30%. Special requests for even higher recycled contents up to and including 100% (50% post-industrial/50% post-consumer) can be provided on an individual basis. Content details are tracked by job and can be provided upon request at time of purchase.

**More recycled content, eco-efficient finishes**

In May of 2009 we made changes to our etch chemistry, in the anodize process, from traditional caustic etch to a more environmentally-friendly acid etch process with a "frostier" matte finish.

- Low gloss level reduces glare in bright sunlight.
- 90% less waste than the traditional caustic-etch process.
- Uses a matte finish with less reflectance for a soft look, with more visual appeal.
- Reduction of energy used in the acid etch process.

## Other Green High Performance Products from Tubelite®

### ThermiBlock™

- Dramatically reduce the transfer of hot and cold temperatures
- Fast easy assembly
- Outstanding craftsmanship, strength, and durability
- No frost buildup
- 300ES has a CRF of 72 compared to 14000 Series that has a CRF of 56 and traditional curtainwall that has a CRF of 66
- Recycled Aluminum, Every Extrusion - Every Time, [www.EcoLuminum.com](http://www.EcoLuminum.com)

### MAXBLOCK® Sunshades by TUBELITE®

- Minimize solar heat gain through efficient shade factor design
- Reduce cooling costs and energy use
- Credits available for LEED projects
- Patented detachable mounting bracket designed to allow reglazing
- Variety of blade and outrigger styles available
- Finishes to match or contrast with Curtainwall framing
- Distinctive architectural design
- Recycled Aluminum, Every Extrusion - Every Time, [www.EcoLuminum.com](http://www.EcoLuminum.com)

## Sustainability at Tubelite®

Tubelite is committed toward integrating both economic and environmental aspects into our business strategies.

We are proud to provide products and services that represent exceptional energy efficient solutions now without compromising the environmental impact on future generations.

Tubelite selectively partners with vendors that share this same passion and collaboratively seeks ways toward improving our overall carbon footprint.

Our dedication to sustainability is not only apparent within our strategic planning processes but in the values we live each day. We support individual employee and team efforts related to the environment and community relations.

Tubelite actively participates in environmentally focused associations such as USGBC and AIA.

We continually search for opportunities that maximize LEED credits for our clients.

**OUR GREEN MISSION:** To become the leader in providing our clients with the optimal overall package. Superior energy efficient and labor-saving products; environmentally mindful material and finishes; premier service and competitive pricing.

### Corporate Sustainability Goals

By FY2012 significantly reduce:

- Greenhouse Gases
- Solid Waste
- Water Use

### Get the Point!

These Tubelite products can help with the following LEED points:

- EA 1 - Optimize Energy Performance
- EQ 6.2 Thermal Comfort
- MR 4.1 & 4.2 Recycled Content
- EQ 8.1 & 8.2 Daylight & Views
