TUBELITE®

DEPENDABLE

LEADERS IN ECO-EFFICIENT STOREFRONT,
CURTAINWALL AND ENTRANCE SYSTEMS

Engineering Bulletin: **062001**

Date: **06/25/2018**

Effective Date: 06/25/2018

Released By: **Jon O'Neil**

Systems Affected: **All Curtainwall, Storefront,
Ribbon Window and Entrances**

Subject: **Dry Lubrication Gaskets**

Effective 6/25/18, Tubelite will have a dry lubricant incorporated onto the gaskets listed below at no additional charge. Dry lube is a one component polyurethane water based resinous lubricant that will not have the excessive silicone residue produced by silicone bathing. This will significantly help reduce or eliminate silicone runs on the glass and spending less time cleaning up.

Thank you for your valued business and continued support.
