Subject: **Steel Channel Reinforcement**

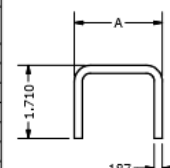

We are pleased to announce that Tubelite now offers steel reinforcement channels in multiple variations of stackable C channels to fit the projects specific needs. They are available in lengths of 12' (P6610 & P6611) and 20' (P6620 & P6621) with a Zinc chromate primer. Our Structural Engineering department will incorporate these into project reviews where necessary. Contact them for any questions.

Please note these parts have a 3 week leadtime and will ship directly from the steel supplier.
