LEADERS IN ECO-EFFICIENT STOREFRONT,
CURTAINWALL AND ENTRANCE SYSTEMS

Engineering Bulletin: **ECR000135**
Communication Date: **9/11/2018**
Effective Date: **9/24/2018**
Released By: **Greg Hall**
Systems Affected: **400TU CURTAIN WALL**
Subject: **Pressure plate fastener change**

In an effort to continuously improve our product, we are making a change to the pressure plate screw for the 400TU curtain wall system. Effective on the date noted above, the S425-OR will be replaced by S400-OR. The new S400-OR has a longer drill point for improved cutting into the mullion tongue, resulting in faster attachment of the pressure plates to the framing members.
