**DEPENDABLE**

LEADERS IN ECO-EFFICIENT STOREFRONT,  
CURTAINWALL AND ENTRANCE SYSTEMS

Date: **05/24/16**

Engineering Bulletin: 051602

Effective Date: Immediately

Released By: **Greg Hall**

Subject: **MaxBlock details**

**A revised perimeter sheet and PDF details will be made available online to reflect a recent change in the pocket fillers shown.**

**The P4563 PVC pocket filler is now shown throughout the details as an optional pocket filler for storefront jamb details using the MaxBlock Sunshades. This was done to be consistent in the pocket filler shown throughout these details and to maintain the integrity of the thermally broken systems.**

**The E1411 aluminum filler is still available, should you require this part for a particular application.**
