

Date: **9/22/17**

Engineering Bulletin: **091701**

Effective Date: 9/22/17

Released By: **Mary Avery**

Subject: **Dual lancing on single pour and debridged profiles**

- Effective immediately, you may receive material for T24650 or 900RW profiles with lancing in the second (empty) pocket.

**LANCED ONLY**

- This does not impact the product's structural integrity.
- Using the dual path process will assist in maintaining our quick and consistent lead-times.
