

More natural daylight. Less artificial lighting needs.

aLuminate light shelves are designed for use with most Tubelite storefront and curtainwall framing systems, as well as many other aluminum framing systems.

The design effectively increases the amount of natural daylight reaching deeper into occupied areas, which reduces the need for artificial light.

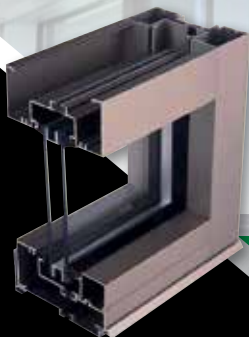

A unique, easy-to-install in-rigger bracket fastens at the interior vertical.

Curved reflectors can be painted bright white for maximum reflectivity and diffusion of sunlight.

"Sleek design, innovative science, well thought out technologically, very impressive."
